## Next Generation VR Experience

### 4K Micro-OLED Displays

Dual 4K displays with 120Hz refresh rate deliver stunning clarity and smoothness that eliminates screen door effect.

### 220° Field of View

Ultra-wide field of view creates true peripheral vision for complete immersion in your virtual world.

### Wireless Freedom

Advanced 60GHz wireless technology delivers uncompressed video with less than 5ms latency.

### Precision Tracking

Inside-out tracking with 32 sensors captures every movement with millimeter accuracy.

### Neural Interface

Optional neural sensors detect facial expressions and eye movements for next-level social VR.

### Lightweight Design

At just 380g, our ergonomic design distributes weight evenly for comfortable extended use.

## Technical Specifications

### Displays

Dual 4K Micro-OLED, 120Hz refresh rate, HDR10, 1000 nits peak brightness

### Processor

Custom XR2+ chip with dedicated AI co-processor and 12GB RAM

### Field of View

220° horizontal, 135° vertical (human eye equivalent)

### Connectivity

Wi-Fi 6E, Bluetooth 5.2, 60GHz wireless module

### Battery Life

3-5 hours continuous use, fast charging (50% in 15 minutes)

## Ready to Redefine Your Reality?

Join thousands of early adopters who are already experiencing the future of virtual reality with NEXUS VR.
